

ANFW

A professional FireWire & USB storage solution, designed for next generation DV, HDV and MPEG-based editing & production. The ANFW™ desktop line of video storage offers superior performance, and connectivity options for commercial & home studio integration. With an attractive aluminum alloy design, ANFW desktop drives offers industry proven performance & value, in a unique stylized desktop form factor. ANFW desktop drives are available from authorized dealers world-wide.

A professional video solution created just for today's demanding real-time video editing, motion graphics and high resolution multi-track audio. Equipped with the latest Oxford chipset, the ANFW professional series is a Digital Content Creator's dream. The ANFW desktop drive solutions only use hard disks qualified for video production.

ANFW has been tested & validated with leading video editing packages such as Apple's Final Cut Pro, Avid Xpress Pro, and Adobe's Premier Pro.
